FLORIDA A&M UNIVERSITY-FLORIDA STATE UNIVERSITY
COLLEGE OF ENGINEERING

Meeting Minutes

Sponsor: N/A
Mouthpiece
Team Members
Ian Tyrell Group Lead Front-end Engineer
Peyton Smith Back-end Engineer
Julien Denis Back-end Engineer
Christian Robinson Front-end Engineer
Advisor: Petru Andrei
Instructor: Dr. Noroozi
Teaching Assistant: Hebert Lopez

Mouthpiece
Wednesday, January 25th, 2023

Attendance
Petru Andrei

Topics
- GitHub repository setup and working on all machines
- App development starting, home and login screen logic
- Firebase initialization (Database of choice)
- UI/UX design nearing completion (Figma)

Meeting Minutes: 27 minutes

Methods to track open actions: Work breakdown structure shows a time schedule of tasks to be completed for the Spring semester. Our main priority is continuing our work with our Udemy course for iOS development (modules 1-10). With the Udemy coursework done, and most of the UI/UX mock-up prototyping constructed, we are ready to start developing and writing code in Xcode. The back-end engineers will start constructing the framework for the data to be constructed. The front-end engineers will continue building up the UI/UX prototypes. The work breakdown report shows the start and end date for our tasks as well as weekly tasks to be done by the entire group
