FLORIDA A&M UNIVERSITY-FLORIDA STATE UNIVERSITY
COLLEGE OF ENGINEERING

Meeting Minutes

Sponsor: N/A Mouthpiece **Team Members** Ian Tyrell Group Lead Front-end Engineer Peyton Smith Back-end Engineer Julien Denis Back-end Engineer Christian Robinson Front-end Engineer Advisor: Petru Andrei Instructor: Dr. Noroozi Teaching Assistant: Hebert Lopez	**Mouthpiece** Wednesday, October 5th, 2022 **Attendance** Petru Andrei

Topics
- Database options (Cloud AWS, SQLite, Realm, Apple's Core Data, Firebase)
- App architecture implementation – MVVM/MVC design patterns
- App development plan (models and framework first then transition to front-end development then connect the two through a view-model)
- UI/UX design (Concept Generation showcase)

Meeting Minutes: 31 minutes

Methods to track open actions: Work breakdown structure shows a time schedule of tasks to be completed for the Fall semester. Our main priority is continuing our work with our Udemy course for iOS development (modules 1-10). Furthermore, having the front-end engineers work on some UI/UX designs that can be used for concept generation alongside Udemy course progression. The work breakdown report shows the start and end date for our tasks as well as weekly tasks to be done by the entire group. No changes of tasks since last submission, everything is going smoothly according to plan.
