Team #305
Mouthpiece Social media Application
Names: Ian Tyrell, Christan Robinson, Peyton Smith, Julien Denis

Date: 12/02/2022

Mission Statement

Team 305 is committed to ensuring a positive work environment that supports professionalism, integrity, respect, and trust while also ensuring that weekly tasks are met accordingly in order to get a working prototype by the end of semester(s). Every member of the team will play a part in committing all effort possible to the creation of said prototype that best represents what we are all working hard to create.

- Completed Fall Semester Goals
    - Initiate Swift course and lesson plans for software engineers.
    - Survey athletes in the area in order to scale out matrices of importance for application features.
    - Create deadlines, micro deadlines, and immediate deadlines for paperwork, class forms, NDA agreements, and lesson plans.
    - Design a UX/UI wireframe that shall highlight the front end of the mobile application.
    - Have a concrete plan for the functionality of the application, filling all holes.

- Spring Semester Goals
    - Continue development with the code homed on a private git server.
    - Create weekly, biweekly development deadlines that align with the progress of the application.
    - Finish prototype by April
    - Stress test good, functionality test good, and minor bug reports. By April
    - Patreon and sponsor funding. By March
    - Working prototype whose features are working efficiently. By April
